

Reliance Industries

Sum-of-the-Parts Valuation

NSE: RELIANCE · ₹ crore · per-share values in ₹ · as of FY2026 audited segment results · market data 18 Sep 2026

A sum-of-the-parts valuation of Reliance Industries on the audited FY2026 segment results and 18 September 2026 market data. Each of the five reported segments is valued on its own peer group, RIL's economic share is taken, consolidated net debt and a holding-company discount are deducted, and the bridge is then run backwards to show the multiple the market is paying for Jio Platforms ahead of its listing.

What this is

How it is built

- Segment EBITDA from the audited Ind AS 108 segment note; ownership stakes in Jio Platforms and Reliance Retail Ventures from the annual report.
- Peer multiples read from public market data with each exclusion stated and reasoned; the selected multiple is shown against the peer median so the judgement is visible.
- Net debt on the same adjusted basis as Project 8, so the two workbooks agree to the rupee.
- A market-implied solve for the Jio and Retail multiples, two sensitivity grids and a low–high range.

Contents

[Summary](#) — [the parts, the bridge, the per-share value and the market-implied Jio multiple](#)
[SOTP](#) — [segment EVs, RIL share, net debt, discount, per-share](#)
[Peers](#) — [peer multiples by segment with medians and exclusions](#)
[Market-Implied](#) — [the Jio and Retail multiples the share price implies](#)
[Sensitivity](#) — [Jio versus Retail multiple, Jio versus discount, low–high range](#)
[Inputs](#) — [segment EBITDA, stakes, selected multiples, group items, market data](#)
[Checks](#) — [sixteen tests; must read MODEL OK](#)

Key outputs (live)

Gross asset value (₹ crore)	1,848,611
SOTP value per share (₹)	1,064.61
Share price (₹)	1,244.60
Upside / (downside)	(14.5%)
Market-implied Jio EV / EBITDA	17.3x
Market-implied Jio EV (US\$ bn)	158.4

Sources

Reliance Industries Limited, audited consolidated segment information for the year ended 31 March 2026 (media release, 24 April 2026).

Ownership stakes in Jio Platforms (67.03%) and Reliance Retail Ventures (85.06%): Reliance Industries annual report.

Peer EV / EBITDA multiples: Yahoo Finance, 18 September 2026, as listed on the Peers sheet.

Share price: NSE close, 18 September 2026. Holding-company discount is a stated input.

Nothing here is a recommendation. The valuation is an analytical exercise on public information.

Reliance Industries — Sum-of-the-Parts Valuation

RELIANCE INDUSTRIES

Segment EBITDA, ownership, selected multiples and group-level items

SEGMENT EBITDA AND OWNERSHIP (₹ crore, FY2026 audited segment information)							
Segment	FY2025A	FY2026A	Growth	RIL stake	Multiple	Low	High
Digital Services (Jio Platforms)	65,001	76,560	17.8%	67.0%	12.0x	10.0x	14.0x
Retail (Reliance Retail Ventures)	25,094	27,034	7.7%	85.1%	25.0x	20.0x	30.0x
Oil to Chemicals	54,988	60,546	10.1%	100.0%	7.5x	6.5x	8.5x
Oil and Gas (E&P)	21,188	19,050	(10.1%)	100.0%	5.0x	4.0x	6.0x
Others (media, consumer brands, new energy)	8,526	10,857	27.3%	100.0%	10.0x	8.0x	12.0x
Total segment EBITDA	174,797	194,047					

RIL stake in Jio Platforms is 67.03% after the 2020 investments by Meta, Google, Vista, KKR, PIF and others; in Reliance Retail Ventures it is 85.06% after the 2020 and 2023 rounds. Stakes are stated inputs from the annual report. Multiples are selected on the Peers sheet.

GROUP-LEVEL ITEMS (₹ crore)		
Consolidated EBITDA, as reported	207,911	Exceeds the segment total by unallocated interest income and the one-off disposal gain; segments are valued, the rest is not
Outstanding debt (company definition)	374,421	
Cash and cash equivalents (company definition)	249,704	
Lease liabilities	23,579	
Deferred spectrum liabilities	99,552	Sits in Jio economically; deducted at group level here, see the SOTP note
Adjusted net debt (consistent with Project 8)	247,848	
Non-controlling interests at book (memo, not deducted)	181,836	Minorities are handled through the stake percentages, so deducting book NCI as well would double count
Holding-company discount	10.0%	

MARKET DATA	
Share price (₹, NSE close 18 Sep 2026)	1,244.60
Shares outstanding (crore)	1,353.25
Market capitalisation	1,684,255
Diluted EPS, FY2026 (₹)	59.69
52-week low (₹)	1,235.30
52-week high (₹)	1,611.80

Selected multiple for the segment		10.0x			
Selected versus median		(37.5%)			

Multiples are trailing enterprise value to EBITDA as published by Yahoo Finance on 18 September 2026 and are stated inputs; an exclusion is made only where the trailing figure is not a valuation signal and the reason is written next to it. Selected multiples sit below the peer medians for Retail (lower margins, hyper-local investment) and O2C (Indian marketing discount, weak chemical deltas), and slightly above for Digital (19% EBITDA growth against Bharti's mid-teens, with Bharti as the anchor).

Reliance Industries — Sum-of-the-Parts Valuation

RELIANCE INDUSTRIES

Segment enterprise values, RIL's share, net debt, discount and value per share

SEGMENT VALUES (₹ crore)							
Segment	EBITDA FY26	Multiple	Segment EV	RIL stake	RIL share of EV	% of gross	Per share (₹)
Digital Services (Jio Platforms)	76,560	12.0x	918,720	67.0%	615,818	33.3%	455.07
Retail (Reliance Retail Ventures)	27,034	25.0x	675,850	85.1%	574,878	31.1%	424.81
Oil to Chemicals	60,546	7.5x	454,095	100.0%	454,095	24.6%	335.56
Oil and Gas (E&P)	19,050	5.0x	95,250	100.0%	95,250	5.2%	70.39
Others (media, consumer brands, new energy)	10,857	10.0x	108,570	100.0%	108,570	5.9%	80.23
Gross asset value (RIL share)					1,848,611		1,366.05

FROM GROSS ASSET VALUE TO EQUITY VALUE

Less: adjusted net debt	(247,848)
Net asset value before discount	1,600,763
Less: holding-company discount	(160,076)
Equity value	1,440,687

PER SHARE

Gross asset value per share (₹)	1,366.05
NAV per share before discount (₹)	1,182.90
SOTP value per share (₹)	1,064.61
Share price (₹)	1,244.60
Upside / (downside) to the SOTP value	(14.5%)
Implied group EV / segment EBITDA at the SOTP value	8.7x
Market EV / segment EBITDA today	10.0x
Implied P/E at the SOTP value	17.8x

Net debt is deducted at group level in full although roughly a third of the spectrum liabilities belong economically to Jio's minority shareholders. The alternative — deducting Jio's own net debt inside the segment before applying the stake — needs Jio's balance sheet, which the results release does not give. The simplification understates value by roughly ₹25 per share and is left in because it errs the right way.

Reliance Industries — Sum-of-the-Parts Valuation

RELIANCE INDUSTRIES

Run backwards: what is the market paying for Jio Platforms today?

SOLVE FOR THE JIO MULTIPLE THE SHARE PRICE IMPLIES

Market capitalisation	1,684,255
Equity value before discount the market implies (market cap / (1 – discount))	1,871,394
Gross asset value the market implies	2,119,242
Less: RIL's share of the other four segments at base multiples	(1,232,793)
RIL's share of Jio Platforms EV the market implies	886,449
Jio Platforms EV at 100%	1,322,467
Market-implied Jio EV / EBITDA	17.3x
Premium to the telecom peer median	79.0%
Premium to Bharti Airtel's multiple	48.9%
Market-implied Jio Platforms EV in US\$ billion at ₹83.5	158.4

Bharti is the direct listed comparable and the anchor a Jio IPO will be priced against

THE SAME SOLVE FOR RETAIL

RIL's share of Retail EV the market implies (Jio at base)	845,509
Retail EV at 100%	994,015
Market-implied Retail EV / EBITDA	36.8x
Market-implied Retail EV in US\$ billion	119.0

The 2023 private round valued Reliance Retail Ventures at roughly US\$100 billion

Only one segment can be solved for at a time; each solve holds the other four at their base multiples. The Jio solve is the useful one because Jio is about to be priced by a public market, and the gap between this number and the eventual listing multiple is the size of the re-rating the sell-side is arguing about.

Equity value (₹ crore)	1,440,687

PER SHARE

SOTP value per share (₹)	1,064.61
Range, all segments low to high (₹)	853 – 1,277
Share price (₹)	1,244.60
Upside / (downside)	(14.5%)

WHAT THE MARKET IS PAYING FOR JIO

Market-implied Jio EV / EBITDA	17.3x
Market-implied Jio EV (US\$ billion)	158.4
Selected Jio multiple in the SOTP	12.0x
Premium to Bharti Airtel implied by the price	48.9%

• Jio and Retail together are roughly two-thirds of gross asset value; the energy businesses that generate over 40% of EBITDA are worth well under a third of it. That is the whole investment case for the group's last decade in one line.

• At peer multiples the SOTP sits below the share price, not above it. Run backwards, the price is consistent with Jio Platforms at roughly 17x EBITDA — a premium of about half to Bharti Airtel — or, equivalently, with Retail near 40x. The market has already priced a Jio listing at a premium; the IPO is the event that tests whether it is right.

• The holding-company discount is the single largest judgement after the Jio multiple. Each five points is worth about ₹90 per share, which is the second sensitivity grid.

• The energy segments are valued on peer multiples rather than through the cycle. O2C EBITDA in FY2026 was helped by strong middle-distillate cracks; a mid-cycle number would take ₹30–40 per share off the total.

MODEL STATUS

MODEL OK

The twelfth check is the important one: it substitutes the market-implied Jio multiple back into the full bridge and demands the share price come out, which proves the reverse solve is the exact inverse of the forward model.
