is stated · fiscal years ending late September

Integrated income statement, balance sheet and cash-flow forecast FY2026E–FY2030E driven from an assumptions sheet with Base / Upside / Downside cases.

Change the scenario in Inputs!C4 (1 = Base, 2 = Upside, 3 = Downside). Edit blue cells only. Every other cell is a formula.

Blue = hard-coded input · Black = formula · Green = link to another sheet · Yellow fill = the scenario selector and key levers.

Inputs → Historical → Model (IS, BS, CF and schedules) → Checks → Summary.

FY2022–FY2025 from Apple's Form 10-K filings (SEC EDGAR, CIK 0000320193), pulled via Yahoo Finance and reconciled to reported totals on the Historical sheet.

Interest on opening balances (no circularity); receivables include vendor non-trade receivables; other current liabilities include accrued expenses, deferred revenue and taxes payable; long-term marketable securities modelled as a run-off input; buybacks charged to retained earnings
